EXPERIENCE

HuddleUp, New York, NY   Oct 2016 - present
Senior Mobile Engineer
- Develop core front-end functionality for native iOS and Android apps using Typescript, React Native, Redux, Redux-Saga, and the Firebase sdk.
- Develop back-end features using Node/Express; create Node service to store/retrieve data from a PostgreSQL database.
- Create web tools using React for services like data reporting and onboarding.
- Maintain and develop various processes related to builds, deployments, and other developer operations.

Delivery.com, New York, NY   Dec 2014 - Oct 2016
Front-End Engineer
- Develop core features during rewrite of native iOS app using Swift, Objective C, and React Native. Features include the end-to-end laundry experience, an order details screen with rate/review functionality, and adding lazy loading / filtering to a large list of past orders.
- Part of a three-person team who rewrote Android app using React Native / Redux. Implement major functionality throughout app, including address search, cart, and the end-to-end laundry experience.
- Develop features for Angular responsive website in an Agile Environment. Projects include a laundry price comparison tool, dish recommendations widget using information from previous orders, and a post-checkout promotional game.

vente-privee USA, New York, NY   Jul 2014 - Dec 2014
Front-End Engineer
- Design and develop front-end features for desktop and mobile websites in an agile environment with a team of designers, back-end engineers, and database architects.
- Projects include a brand search autocomplete widget and shopping cart waitlist functionality.

General Assembly, New York, NY   Jun 2014 - Sep 2014
Teaching Assistant
- Provide assignment and project support for students participating in the Web Development Immersive program.

General Assembly, New York, NY
Student, Web Development Immersive Program
- Complete a 12-week bootcamp that teaches fundamental programming, computer science, and web development concepts.
- Develop and deploy three full-stack web applications using a RESTful architecture and software design principles such as Agile Development and TDD / BDD.

Balyasny Asset Management, New York, NY   Jun 2012 - Oct 2013
Equity Research Analyst   (intern) Jun 2012 - Oct 2013
- Research and give investment recommendations for 15-20 public companies in the internet sector.
