EXPERIENCE

Global Travel   Jul 2017 - Aug 2018
- Spent 1 year abroad visiting 35 countries in 13 months.
- Built and released Halfcourt on iOS and Android, an app built using React Native to facilitate scheduling pickup basketball games in New York City.
- Features include a map of court locations, geolocation-based searching, favoriting, game scheduling, image upload, an activity feed, game reminders / push notifications, and more.

HuddleUp, New York, NY   Oct 2016 - October 2017
Senior Mobile Engineer
- Develop core front-end functionality for iOS and Android apps using React Native, Typescript, Redux, Redux-Saga, and Firebase.
- Create from scratch and maintain React Web app, leveraging shared code across iOS, Android, and Web.
- Develop back-end features for both web and mobile using NodeJS/Express and some Golang.
- Features developed across all platforms include group chat, image upload, "at-mentioning", sign up / onboarding flow, desktop and mobile push notifications, and more.
- Maintain and develop various processes related to builds, deployments, and other developer operations.

Delivery.com, New York, NY   Dec 2014 - Oct 2016
Front-End Engineer
- Develop core features during rewrite of native iOS app using Swift, Objective C, and React Native. Features include the end-to-end laundry experience, an order details screen with rate/review functionality, and adding lazy loading / filtering to a large list of past orders.
- Part of a three-person team who rewrote Android app using React Native / Redux. Implement major functionality throughout app, including address search, cart, and the end-to-end laundry experience.
- Develop features for Angular responsive website in an Agile Environment. Projects include a laundry price comparison tool, dish recommendations widget using information from previous orders, and a post-checkout promotional game.

vente-privee USA, New York, NY   Jul 2014 - Dec 2014
Front-End Engineer
- Design and develop front-end features for desktop and mobile websites in an agile environment with a team of designers, back-end engineers, and database architects.
- Projects include a brand search autocomplete widget and shopping cart waitlist functionality.

General Assembly, New York, NY   Feb 2014 - Sep 2014
Student / Teaching Assistant, Web Development Immersive Program
- Complete 12-week bootcamp that teaches fundamental programming, computer science, and web development concepts.
- Provide assignment and project support for students participating in the Web Development Immersive program.

Balyasny Asset Management, New York, NY   Jun 2012 - Oct 2013
Equity Research Analyst
- Research and give investment recommendations for 15-20 public companies in the internet sector.
